

Better Plants. Better Advice. Better Results.

PL-1 Attract Butterflies to your Yard

Butterflies require both host plants on which to lay their eggs and provide food for the caterpillars plus nectar plants which feed the butterflies. Most of these plants require a sunny location.

Other elements to include are shrubs for protection; rotting meat, fruit or tree sap or animal droppings; larval food or host plants; wet mud and puddles. This list will get you started.

Trees, Shrubs and Vines
