

NOVEMBER TIMELY TIPS

NO WEED ZONE

Apply a pre-emergent weed control to open areas in your landscape. Many cool-season weeds, including cheatgrass will emerge in late winter or very early spring. Apply by the end of the month to get ahead of next year's weeds.

from Moana Nursery

Ice Ice Baby

Once nighttime temps drop to below freezing for a few consecutive days, turn off your irrigation system & drain the valves.

THAT'S A WRAP

Wrap evergreen trees & shrubs like arborvitae with plastic or twine to prevent splaying of branches during winter snowstorms.

Protect your pots

Cover any empty pots, or, if possible, move indoors or store in a shed or garage. Prep all cold sensitive pottery for winter weather. Drain any standing water, remove drip trays, lift pots off the ground using pot feet or wood blocks. Ground water can pool and freeze to the pot, which leads to cracking & breaking.

STORE ALL UNUSED FERTILIZERS, HERBICIDES, PESTICIDES AND CHEMICALS IN ORIGINAL, LABELED CONTAINERS; CHECK EXPIRATION DATES TO BE SURE THEY'RE STILL VIABLE. BE SURE TO STORE IN A WARM & DRY PLACE TO PREVENT FREEZING.

Continue to plant and water newly planted trees and shrubs, especially evergreens, until the ground freezes.

Clean & oil your garden tools. Store indoors for winter.

MULCH GARDEN BEDS AFTER THE GROUND FREEZES.

Avoid walking on frozen lawns; frozen grass blades are very fragile and will break under pressure.

Regularly rake lawns to keep falling leaves and twigs from suffocating grass.

DID YOU KNOW?

Salt-based, de-icing products are hard on your yard!

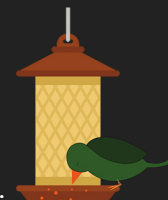

Free your garden paths of ice & snow with an environmentally safe de-icer like Sierra Blue Snow & Ice Melt

CONTINUE TO PLANT SPRING BLOOMING BULBS AS WEATHER & SOIL CONDITIONS PERMIT. BE SURE TO FERTILIZE & WATER UNTIL THE GROUND FREEZES. LAYER & PLANT 'LASAGNA' STYLE FOR LONGER BLOOMS.

Hang a cylinder feeder with one of our many seed or suet cylinder choices for easy no-fuss bird feeding in winter. Be sure to check out our winter blend seed cylinders, fun characters & festive wreaths along with special seed cylinder holders.

FEED HIGH FAT, HIGH CALORIC CONTENT SEEDS TO HELP SATISFY BIRDS' COLD WEATHER NEEDS. NYJER®, PEANUTS AND FINCH BLEND ALL ADD MUCH-NEEDED CALORIES.

For tailored advice or product recommendations, see your local plant doctor.
